

Daikin Ductless Wi-Fi Onboard Homeowner Guide

Connect to Comfort

with *SkyportHome*

SkyportHome

Smart Wi-Fi Enabled Single and Multi-Zone Systems

Say Goodbye to IR Remotes & Thermostats

Built-in Wi-Fi connectivity eliminates the need for infrared remotes and replaces traditional thermostats — delivering a streamlined, modern control experience.

Powerful App at Your Fingertips

- » Monitor room temperature, On/Off and Mode
- » Adjust setpoints
- » Switch operating modes
- » Create custom schedules
- » View error code
- » °C and °F (based on regional setting)
- » French / English / Spanish language support

Whole-Home Control from One Device

Manage every unit in a Multi-Zone system from a single smartphone — simplifying installation and operation.

This quick guide explains how to use your Wi-Fi enabled Daikin single and multi-zone systems* when they are connected to the *SkyportHome* app.

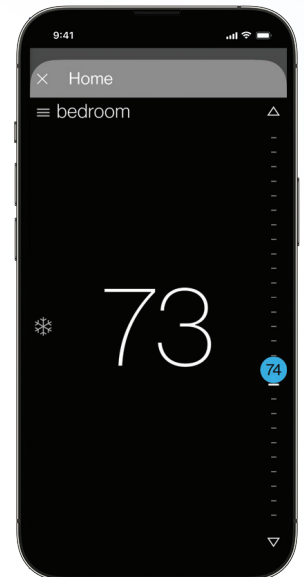

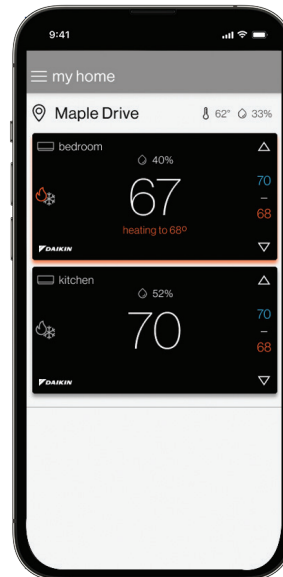

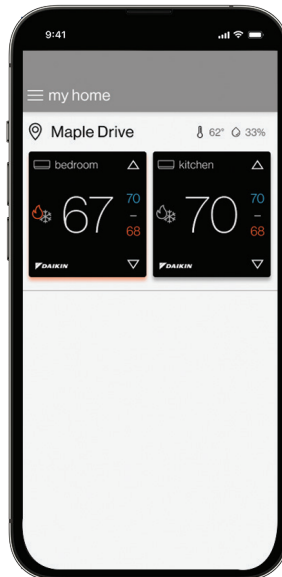

1

Login to or Create an account for *SkyportHome* to get started.

2

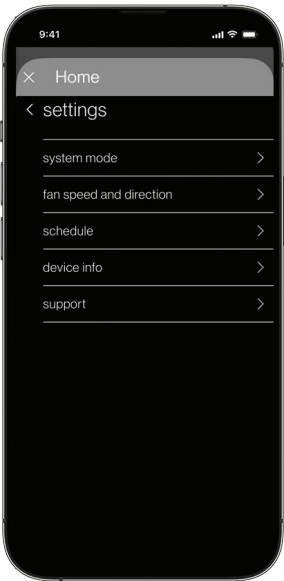

After connecting the mini split to your *SkyportHome* account you will see it in your dashboard as a tile. You can adjust the mode and temperature from here or open that tile to expand it like a thermostat.

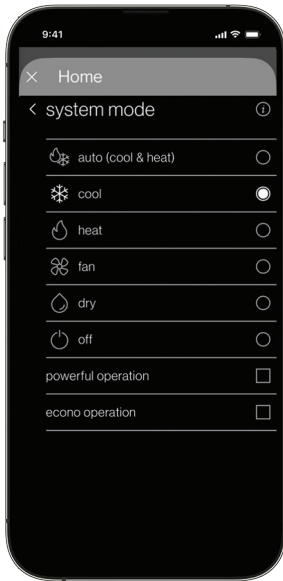

* Ask your dealer today if your unit is compatible.

Settings and Features

Under the settings screen you will find submenus that you can use to adjust your unit like change the mode, fan function, set a schedule or look at device information.

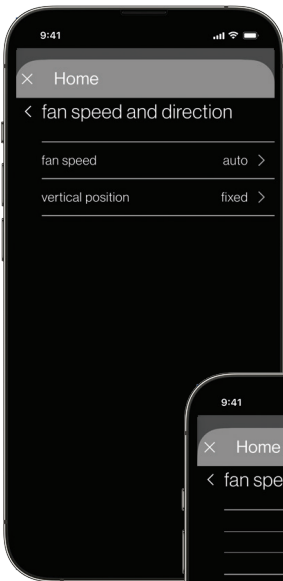

Under system mode you have all your traditional modes plus dry mode, powerful mode and econo mode.

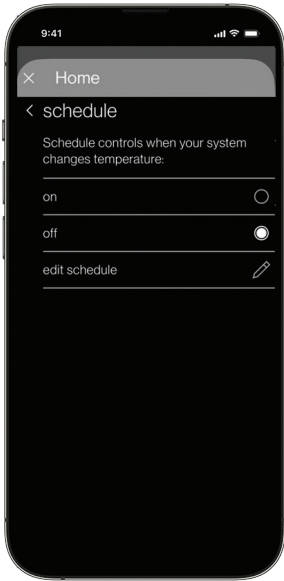

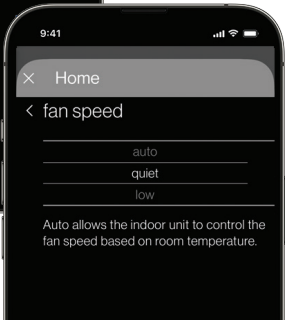

Dry mode is for dehumidification mode.

Powerful mode maximizes the cooling effect in any operation mode.

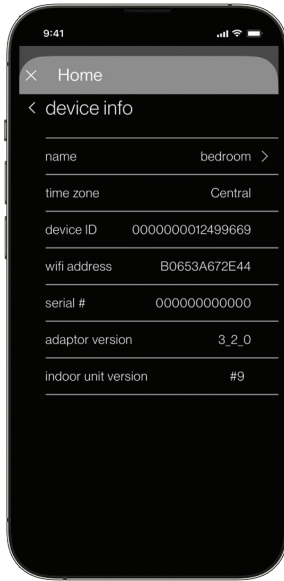

Econo mode enables efficient operation by limiting the maximum power consumption.

Fan speed and direction screen allows you to adjust fan speed to your desired setting and allows you to set the louvers to fixed or oscillating.

Schedule allows you to create or edit a schedule.

Device info screen allows you to change the device name and see all the device information.
