

Re-imagine What **Comfort** Looks Like –  
Anywhere in Your Home.

**Main Bedroom**

**She Shed**

**Garage Conversion**

**Room Addition**

**Sunroom**

Daikin's range of single zone systems deliver targeted heating and cooling - no ductwork, no disruption, and ideal comfort.

# Comfort **Solutions** for your Space.

Turn any project into a comfort upgrade. With Daikin's single zone systems, you'll enjoy targeted heating and cooling- no ducts, no mess, just effortless comfort for every space.

## Additions

**Renovating your home or adding extra space? It's the perfect time to re-evaluate your HVAC system.**

A new floor plan can place added demands on your existing equipment and ductwork, and in many cases, the system may not be sized or designed to handle the change. That's when upgrading to a more efficient comfort solution makes sense.

### Expanding your space?

A ductless mini-split system offers a smart, cost-effective alternative to a full system replacement- delivering comfort without the expense or hassle of adding new ductwork.

## New Buildings & Renovations

**Building a She Shed, finishing an attic, or renovating a favorite space? Every new living area deserves a comfort solution designed to match.**

A ductless mini-split system is ideal for finished attics, offering easy installation with minimal or no ductwork. It's a cost-effective way to heat and cool newly converted spaces.

For new buildings, comfort depends on thoughtful planning — room size, layout, ceiling height, and local codes all matter. Ductless systems offer flexible zoning and year-round comfort without major construction.

For accessory dwelling units (ADU), consider a multi-zone ductless system which has multiple indoor units connected to a single outdoor unit.

## Conversions

**Thinking about transforming your space into a hobby room, home gym, or Man Cave? Comfort makes all the difference.**

A single zone ductless mini-split system is designed to offer personalized, energy efficient heating and cooling year-round. It's compact, quick to install, and doesn't require ductwork — making it a great solution for converted spaces, like garages.

Professional installation ensures your space stays just the way you like it, season after season.

## Why are Homeowners **Choosing Daikin Ductless?**

### Simple Installation

On average most systems can easily be installed within 2 to 6 hours, depending on the layout and job scope.

### Low Sound Levels

Indoor sound levels as low as an average 19 dB(A), (like a whisper) with outdoor units operating around 46 dB(A).

### 12-Year Limited Warranty\*

Includes parts coverage for added confidence in your investment.

### Versatile Applications

Solutions are available for spaces like bonus rooms, garages, in-law suites, and more.

### Designed for Comfort

Helps provide consistent indoor temperatures with targeted zone control.

### Energy-Conscious Operation

Engineered to support energy-saving goals based on system usage and design.

Scan to explore how Daikin Ductless can transform your space.

# Flexible options. Quiet performance. Comfort control.

## Smart inverter technology

Integrated with an inverter (variable-speed) compressor, Daikin systems deliver the capacity required to maintain desired room conditions, typically reducing energy consumption by up to 30% or more compared to traditional fixed-speed ducted systems. This technology minimizes temperature fluctuations and provides continuous cooling and heating comfort.

## Control

Our expertise makes life easier for you, allowing you to control your system via a user-friendly remote control.

## Energy efficiency

Our products are designed to be highly efficient all year round, and are designed for low energy consumption and low energy bills.

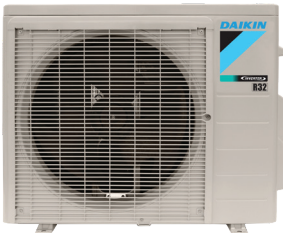

## Reliability

Daikin products are renowned for their reliability. And you can rely on outstanding limited warranties\* to match.

## The Daikin Difference:

### Outdoor unit features:

**Anti-Corrosion Treatment** on Heat Exchanger

**Quick Warming Function** – Prevents the compressor from turning off during heating operation in low-ambient conditions. (Heat pump only)

**Automatic Defrosting** – Sensor performs automatic defrosting of the outdoor heat exchanger if necessary, improving heating performance.

**Did You Know** – Our outdoor unit drain pans have up to 10 holes that allow for effective drainage of condensation. In some cases, this improved drain efficiency limits the build-up of ice on heat pans, resulting in high efficiencies in cold ambient temperatures.

### Indoor unit features:

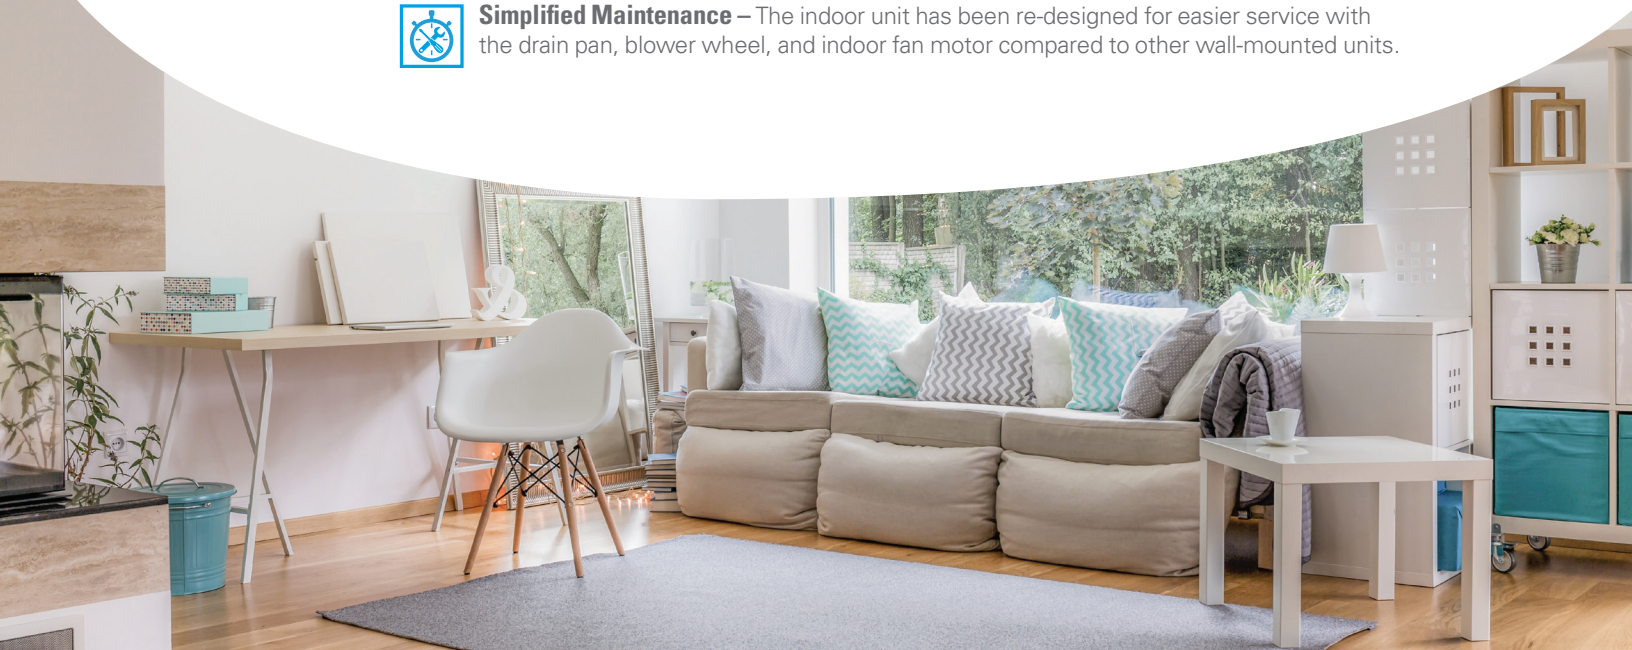

**DKN Cloud App** – Easily control your system from the comfort of your living room or anywhere in the world.

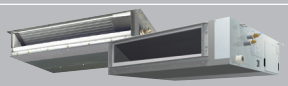

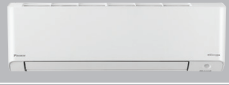

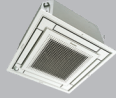

**Blue Fin Protection** – The hydrophilic coated fin ensures that water condensate moves easily to the drain pan — for outstanding cleanliness and reliability of the cooling coil.

**Simplified Maintenance** – The indoor unit has been re-designed for easier service with the drain pan, blower wheel, and indoor fan motor compared to other wall-mounted units.

# Selecting the Right Daikin Ductless System for Your Space:

MODEL	MODEL	TYPE	BENEFITS/DIFFERENCE	
<b>ENTRA</b> WALL-MOUNTED	Wall-Mounted	HP	Entry-level option with solid efficiency; compact and affordable.	
<b>OTERRA</b> WALL-MOUNTED	Wall-Mounted	HP AC	High efficiency and value; 115V and 230V available; excellent for renovations and additions.	
<b>EMURA</b> WALL-MOUNTED	Wall-Mounted	HP	Sleek, modern model; curved style with designer aesthetics. Ideal for aligning with a range of environments.	
<b>AURORA</b> FLOOR-MOUNTED, DUCTED, WALL-MOUNTED	Floor-Mounted, Ducted, Wall-Mounted	HP	Flexible install with multiple configurations; strong cold climate performance.	
<b>FDMQ</b> DUCTED	Ducted	HP	Low-profile ducted solution; concealed and quiet; ideal for ceiling installations.	
<b>POLARA</b> WALL-MOUNTED	Wall-Mounted	HP AC	Affordable and efficient; compact unit ideal for larger spaces.	
<b>ATMOSPHERA</b> WALL-MOUNTED	Wall-Mounted	HP	Outstanding efficiency; with adaptive inverter technology.	
<b>VISTA</b> CEILING CASSETTE	Ceiling-Mounted	HP	Recessed ceiling unit, blends with ceiling, 4-way airflow ideal for larger rooms/spaces.
