

Comfort Solutions for Sunrooms, Bonus Rooms, and Attics.

Turn overlooked spaces into year-round comfort zones.

You've dreamed of expanding your home, and now's the time. A sunroom offers the perfect spot for breakfast, a good book, or games with family and friends. Bonus rooms — whether added downstairs or by converting the attic — can house hobbies that don't fit in the living room. From a cozy retreat to a gym, hobby nook, or versatile flex space, the creation and conditioning of these areas not only add value to your home but also creates memories that last a lifetime.

Sunrooms, bonus rooms, and attics provide flexible living solutions, suitable for both family and work purposes. Daikin ductless HVAC systems are designed to help make these compact spaces comfortable, efficient, and easy to enjoy.

Why Daikin ductless systems are perfect for sunrooms, bonus rooms, and attics:

Flexible, Space-Saving Design: Mini-split systems are compact, ductless, and can be mounted on walls, floors, or ceilings.

No Ductwork Required: Avoid the hassle and expense of installing complex ductwork in your bonus spaces. Mini-split systems don't require ducts and feature minimal installation work, making them a cost-effective choice.

Quick Installation: Mini-split systems can be installed in a few hours* and with minimal disruption to your property, allowing you to utilize your new, comfortable area fast. Some Daikin systems operate on 115V, making them compatible with standard residential electrical systems without the need for an electrical panel upgrade.

Quiet Operation: Mini-split systems operate quietly, ensuring a peaceful atmosphere for everyone.

* Installation time may vary based on job scope and conditions.

Expand the possibilities of your sunroom, bonus room, or attic space:

- » Florida Room / Sunroom
- » Home Theater
- » Finished Attic Office
- » Craft and Hobby Room
- » Personal Gym

Why choose ductless HVAC for your sunroom, bonus room or attic conversion?

Energy Efficiency: Mini-split heat pump systems are designed to provide all-electric, year-round indoor comfort while consuming less energy than traditional single-speed ducted HVAC systems. This means low utility bills and a small carbon footprint.

Zoned Comfort: You control the temperature in a room or zone independently, ensuring your new space remains comfortable without wasting energy on unoccupied areas. And you can easily turn them off when not in use, without affecting the rest of the house.

Improved Air Quality: Some mini-split systems come equipped with advanced filtration technology that helps remove dust, allergens, and other pollutants from the air. For extra dusty environments, ask about the Daikin Room Air Purifier.

Warranty: Daikin ductless mini-split systems offer a 12-year Parts Limited Warranty**

What should I consider before taking the next step?

Professional Assessment: Consult with a Daikin *Pro* for a precise load calculation to determine the correct size for your mini-split system. The Daikin *Pro* will also recommend the ideal installation location, the type of system best suited for your needs, highlight financing options (for qualified buyers), and inform you of any applicable tax credits[^] and incentives.
